My dear Father

I cabled today per enclosed  
and here is Woods' note to me  
which I endorse. If the addition  
is really necessary to a larger output  
go ahead with it.

"I cannot help feeling that the  
"punching" you speak of is due to  
bad management somewhere and  
is reason for poor output but I  
don't want to criticize nor am  
I in a position to. I do hope  
things will go better this fall.

I have your personal letter of  
16 Oct for which many thanks and  
I feel the new inspectors will help  
you and not hold you up too much.  
Don't worry yourself  
and keep well as I am glad to  
hear you are. Very much love  
and in haste to catch mail.  
J. F.
