

From the holdings of  
Western Archives, Western University

and important part of  
the parts from the U.S.  
in the same manner as  
most of the motor car  
lines were first handled.  
Later we could look into  
the manufacture of all  
parts etc.

This is only an idea  
but if the motor is  
a good one there  
should be a big field  
for it. I wrote father  
a few days ago so wont be  
writing again for a couple  
of weeks. Therefore you  
had better write him  
direct giving your views  
and let me know briefly  
what you think.

Am exceedingly busy  
just now as the Pat

3/9/16.

Dear Bob

The enclosed catalogue  
concerning the Waterloo One Man  
Tractor reached me yesterday  
from Father. No letter  
accompanied it

I think well of it  
and would favor someone  
going out there to look  
over their product and claims.  
If satisfactory in every  
respect it might be leased  
while one trying to get the  
Canadian agency as a starter.  
We would have to purchase  
some for demonstration  
purposes and for the next  
year or so might figure  
only on putting them together

Dvt Art'y is co-operating  
with the 49th in  
operations about ~~██████████~~

Yours in haste  
Wood
