April 24th/1916.

My Dear Woodman,-

Please find enclosed a letter from a man who wants to sell you some civilian clothes. When you come home possibly you will want a couple of suits so you had better keep his address.

Enclosed is also a list of shells nosed this week, the short hours to complete the work are attributave to breakages and delays in getting the stuff into the furnace room, so you will understand what Mr.Morgan is up against, 1400 is not a bad output.

I want to get your permission to frame those two panoramic photographs that you sent me showing the country ~~and~~ which you are firing over and the breast work between so that I could have it put up in the Public Library or some conspicuous place for the Public to see. I do not see why you should object to this because these photographs were taken a year ago. They are magnificent pieces of work and it is a shame to have them seen only by you immediate friends at Oakwood. Please write me on this subject immediately.
