The Ministry of Northern Development and Mines, Mines and Minerals Division, has released a new series of maps. These maps are available free of charge and are shown separately. The regional-scale maps include information on bedrock geology and metalliferous and industrial minerals. The index includes maps on the following topics: Precambrian (PRECAM), Paleozoic (PALEOZ), petroleum resources (PETROL), and deposits (DEPOSITS). The maps are available in various scales, including 1:50000, 1:20000, 1:15840, 1:100 000, and 1:1 584 000. The maps are grouped by geographic area and map scale. A limited editorial review has been performed to expedite publication.
